

Abstract

An inflation device (10) for a vehicle occupant restraint system comprises a first pyrotechnic gas generator (12) having a cord-type fuel line (20) and an igniter (18) associated with the fuel line, and a second pyrotechnic gas generator (14) having a housing (30) and fuel elements (32) arranged in the housing (30). The cord-type fuel line (20) is passed through the housing (30) of the second pyrotechnic gas generator (14) and is adapted to release combustion products for igniting the fuel elements (32) of the second gas generator.
